

B. John Perrone
Project Manager

Benjamin “John” Perrone joined ITAC in October of 2005 in the position of Project Manager. In his present role, he is responsible for managing delivery of Lean Manufacturing Principles, company assessments as well as The Project Manager for The MoveSmart/StayLean New York City Council program.

John also has over forty years of manufacturing and management experience, originally in tooling and Quality Control for the foundry industry. He became involved with a technical ceramic supplier to the foundry and decorative industries starting as a process engineer and eventually became the General Manager of this multi-national company supplying products to both the aerospace and high end porcelain manufactures.

As the General Manager of Carpenter Technologies – Certech a division of the Engineered Products Group John was the individual responsible for the planning, design ,equipping and staffing of each new facility as the company grew from a small privately held company through it acquisition by a NYSE public company. John has moved entire facilities within the US as well as built facilities in The United Kingdom, Mexico and Taiwan. All of which eventually became his responsibility as the General Manager.

John has a BS in Manufacturing Technology. He has received training in various methods of Non Destructive Examination, has been a Level III trainer in Radiography, Penetrant and Magnetic Particle inspection, and has a Level II certification in Ultrasonic testing. Within the MEP he has received certifications in Lean Product Development, Value Stream Mapping, The 5S System, Total Productive Maintenance, and Performance Measurements for the Lean Enterprise and is certified by the MEP as a trainer in these principles. In addition John has been certified by the MEP in Leading Small & Mid Size Manufactures to Energy Savings, Enterprise Assessment (EDGE), Strategic and Long Range Planning and Change Management.
