

Lean Enterprise produces more with less or equal resources. Lean practices drive continuous improvement by eliminating waste and streamlining process flow throughout the entire enterprise thus providing the foundation for continued long-term success. You should consider learning more about Lean Enterprise if your firm encounters issues such as:

1. Lead times in excess of customer requirements
2. Excessive work-in process (WIP) inventory
3. Bottlenecks and shortages in product

PRINCIPLES OF LEAN MANUFACTURING WORKSHOP

Reduced cost, improved quality, faster delivery
Learn how to get all three.

Benefits

- Reduced Cycle Time
- Reduced Costs
- Increased Capacity
- Increased Productivity
- Increased Sales
- Improved Cash Flow
- Reduced WIP & Total Inventory
- Reduced Space
- Improved Lead Times
- Improved Quality
- Increased Profits
- Improved Customer Satisfaction

Description

One-Day Workshop at our workshop venue, or if you request, at your location for groups of 14 to16 people.

At this workshop you will learn the principles of Lean Manufacturing, and how to apply them. During the simulation exercises—as a member of the “ITAC Toy Company”, you’ll apply Lean concepts such as standardized work, visual controls, batch-size reduction, pull systems, cell design and more. You’ll experience first hand how Lean improves quality, reduces cycle time, improves delivery, reduces Work-In-Process, and increases profits.

To Learn More

Workshops are given throughout the year, and for internal company groups, upon request. Contact ITAC at 212-442-2990 for more information.
